Contents Volume 226 (2000)

RECENT ADVANCES OF PLANT ROOT STRUCTURE AND FUNCTION PROCEEDINGS OF THE 5TH INTERNATIONAL SYMPOSIUM ON STRUCTURE AND FUNCTION OF ROOTS

Stará Lensná, Slovakia, 31 August – 4 September, 1998

Guest editors:
Otília Gašparíková, Milada Čiamporová, Igor Mistrík and František Baluška

Histochemical analysis of root meristem activity in *Arabidopsis thaliana* using a cyclin:GUS (β-glucuronidase) marker line
M.-T. Hauser and E. Bauer **1–10**

Ultrastructural effects of the herbicide chlorpropham (CIPC) in root tip cells of wheat
E.P. Eleftheriou and E. Bekiari **11–19**

Measurement of viscoelastic properties of root cell walls affected by low pH in lateral roots of *Pisum sativum* L.
E. Tanimoto, S. Fujii, R. Yamamoto and S. Inanaga **21–28**

IAA and ZR content in leek (*Allium porrum* L.), as influenced by P nutrition and arbuscular mycorrhizae, in relation to plant development
A. Torelli, A. Trotta, L. Acerbi, G. Arcidiacono, G. Berta and C. Branca **29–35**

Polyploidy in tomato roots as affected by arbuscular mycorrhizal colonization
G. Berta, A. Fusconi, S. Sampò, G. Lingua, S. Perticone and O. Repetto **37–44**

Water uptake by plant roots: an integration of views
E. Steudle **45–56**

Root-shoot interactions in mineral nutrition
W.D. Jeschke and W. Hartung **57–69**

Nitrogen and base cation uptake in seedlings of *Acer pseudoplatanus* and *Calamagrostis villosa* exposed to an acidified environment
V. Gloser and J. Gloser **71–77**

Nitrate uptake by bean (*Phaseolus vulgaris* L.) roots under phosphate deficiency
A. Gniazdowska and A.M. Rychter **79–85**

Impact of *Agrobacterium tumefaciens*-induced stem tumors on NO_3^- uptake in *Ricinus communis*
I. Mistrik, J. Pavlovkin, R. Wächter, K.S. Pradel, K. Schwalm, W. Hartung, U. Mathesius, C. Stöhr and C.I. Ullrich **87–98**

Response of tomato plants to chilling stress in association with nutrient or phosphorus starvation
Z. Starck, B. Niemyska, J. Bogdan and R.N. Akour Tawalbeh **99–106**

The distribution of lead in duckweed (*Lemna minor* L.) root tip
S. Samardakiewicz and A. Woźny **107–111**

Diverse responses of root cell structure to aluminium stress
M. Čiamporová **113–116**

Relationship between microtubule orientation and patterns of cell expansion in developing cortical cells of *Lemna minor roots*
S. Inada and S. Sato **117–128**

Volume 226 No. 2

ICOM2/COST WORKSHOP
DEVELOPMENT AND FUNCTION OF THE HYPHAE OF ARBUSCULAR MYCORRHIZAL FUNGI (AMF)

Guest editors:
Monica Kling, James H. Graham, Iver Jakobsen and R. Michael Miller

Foreword **v**

MORPHOGENESIS, DETECTION AND BIOMASS OF AMF HYPHAE

Mycelium of Arbuscular Mycorrhizal fungi (AMF) from different genera: form, function and detection
J.C. Dodd, C.L. Boddington, A. Rodriguez, C. Gonzalez-Chavez and I. Mansur **131–151**

Microchambers and video-enhanced light microscopy for monitoring cellular events in living hyphae of arbuscular mycorrhizal fungi
M. Giovannetti, C. Sbrana and C. Logi **153–159**

The growth of external AM fungal mycelium in sand dunes and in experimental systems
P.A. Olsson and P. Wilhelmsson **161–169**

A fluorescent antibody assay for hyphae and glomalin from arbuscular mycorrhizal fungi
S.F. Wright **171–177**

Monitoring species of arbuscular mycorrhizal fungi *in planta* and in soil by nested PCR: application to the study of the impact of sewage sludge
E. Jacquot, D. van Tuinen, S. Gianinazzi and V. Gianinazzi-Pearson **179–188**

Detection of arbuscular mycorrhizal fungi (Glomales) in roots by nested PCR and SSCP (Single Stranded Conformation Polymorphism)
R. Kjøller and S. Rosendahl **189–196**

MEASUREMENT OF ACTIVITY OF AMF IN PLANTS AND IN SOIL

Phosphatase activity of extra-radical arbuscular mycorrhizal hyphae: A review
E.J. Joner, I.M. van Aarle and M. Vosatka 199–210

A rapid staining procedure for arbuscules of living arbuscular mycorrhizas using neutral red as acidotropic dye
M. Guttenberger 211–218

Molecular approaches to study plasma membrane H^+-ATPases in arbuscular mycorrhizas
N. Ferrol, J.M. Barea and C. Azcón-Aguilar 219–225

Metal-binding capacity of arbuscular mycorrhizal mycelium
E.J. Joner, R. Briones and C. Leyval 227–234

NUTRIENT TRANSPORT BY AMF MYCELIUM

Laboratory and field methods for measurement of hyphal uptake of nutrients in soil
P. Schweiger and I. Jakobsen 237–244

^{31}P NMR for the study of P metabolism and translocation in arbuscular mycorrhizal fungi
N. Rasmussen, D.C. Lloyd, R.G. Ratcliffe, P.E. Hansen and I. Jakobsen 245–253

Application of *in vitro* methods to study carbon uptake and transport by AM fungi
D.D. Douds Jr, P.E. Pfeffer and Y. Shachar-Hill 255–261

Putative sites for nutrient uptake in arbuscular mycorrhizal fungi
B. Bago 263–274

Uptake and transport of organic and inorganic nitrogen by arbuscular mycorrhizal fungi
H.-J. Hawkins, A. Johansen and E. George 275–285

Cloning arbuscule-related genes from mycorrhizas
S. Burleigh 287–292

INTEGRATION OF SCALES IN FUTURE RESEARCH OF AMF MYCELIUM

The importance of integration and scale in the arbuscular mycorrhizal symbiosis
R.M. Miller and M. Kling 295–309

Volume Contents 311–313

Author index 315

Instructions for authors 317–323
